Full-Stack Developer with a strong personal portfolio and experience in both e-commerce and client facing websites & applications. Well versed in the front-end ecosystem and adapts quickly to learn and master new technologies.

EXPERIENCE

Shopify Developer - *Total Watch Repair*

- + Designed, developed, and modified custom theme and it's applications using HTML/CSS/Liquid
- + Integrated & tested new 3rd party applications
- + Assisted with driving traffic to website by following basic SEO practices and communicating with SEO manager.

Front-End Developer - *Grace Counseling Services*

- + Developed complete website with catalog of services & courses. Used Bootstrap and custom CSS / SASS for layout & design. jQuery & AJAX for more serious back-end features.
- + Designed web-layout and brand image with Sketch
- + Used Schema & meta-tag SEO practices to generate more traffic for client.

Full-Stack Developer - *Freelance*

- + Created & Designed Web layouts or pages for local businesses.
- + Collaborated with local designers and developers for open source projects like freecodecamp.com.
- + Taught and mentored other new developers when needed.
- + Created personal libraries for quick and consistent code replication using JSON.

Fermentation Research & Development - *Dupont Industrial Biosciences*

- + Researched various processes for Enzyme production and development.
- + Monitored and tested a collection of 56 Bio-Reactors for CO2, Glucose, Cell Evolution, and more to validate and track cell growth.
- + Helped design and create Data Libraries for tracking of past and future fermentation data.
- + Assisted in creation of Fermentation tracking software using Python and Javascript.
